

Rutgers University

Performance Evaluation Form for Fiscal Year 2024 - 2025 (fill in)

Union of Rutgers Administrators-American Federation of Teachers (URA-AFT)

Employee Name: **Delphine Mossman**

Notes: Performance evaluations for URA-AFT employees eligible for the Staff Compensation Program (SCP) must be completed by April 30 of each fiscal year.

For more detailed instructions, see the UHR website (<http://uhr.rutgers.edu/SCP-deans-managers>) or call 848-932-3020 and ask to speak to an HR Consultant.

SECTION 1: APPRAISAL MATRIX

1. List the three to five **Key Duties** (use a word or short phrase to describe the duty) of the position.
2. Indicate the **priority percentage** for each duty (should total 100%).
3. **Appraise each duty** in Sections 3 & 4 (the following page), then **transcribe the rating** to the column below.

<u>Key Duties</u>	<u>Priority</u>	<u>Rating</u>
1. Data Analysis	50%	Meets Standards
2. Data Visualization and Interpretation	20%	Meets Standards
3. Sample Analysis	10%	Meets Standards
4. Data Management	10%	Meets Standards
5. Presentations & Training	10%	Meets Standards

SECTION 2: OVERALL ASSESSMENT

Based upon the appraisal rating for each key duty and its priority level, indicate the employee's overall appraisal rating which reflects his or her performance during the past year by checking one of the categories below. Use the following rating scale and provide comments to explain your rating.

(Check only one.)

- ☒ **Meets Standards.** This rating encompasses a wide range of performance from employees satisfactorily meeting job expectations to making exceptional contributions in advancing the objectives of their departments and/or the university.
- ☐ **Does Not Meet Standards.** Employees who do not satisfactorily meet job expectations and **overall** do not consistently perform their assigned responsibilities adequately will be given this rating. Employees who receive this rating will be provided specific guidelines on how to improve performance and will be reevaluated again by October 15 of this year.

Note: Performance in the higher priority duties should have a greater impact on the overall assessment than performance in the lower priority areas.

Comments (add pages as necessary):

Delphine has proven herself to be a critical contributor to center goals and objectives. She continues to engage in multiple COOL projects and takes responsibility toward their success. She has a very positive attitude that allows her to continue to perform and deliver excellent data products with many projects requiring her attention. She is an invaluable member of the COOL team.

Rutgers University
Performance Evaluation Form for Fiscal Year 2024 - 2025
Union of Rutgers Administrators-American Federation of Teachers (URA-AFT)

Employee Name: [Delphine Mossman](#)

Key Duty #1: [Data Analysis](#)

SECTION 3: PERFORMANCE STANDARDS

For each key duty, describe the performance expectations for the **Meets Standards** level of performance for the current evaluation process.

☐ Check here and detail on an attached page if standards are being modified for next year's evaluation process.

Meets Standards

[Analyze data collected from acoustic sensors on both vessel-based and autonomous ocean observing platforms \(using Echoview and other software programs\). Analyze zooplankton and fish identification, abundance, and size metrics from field-collected and/or preserved samples \(These data will aid in acoustic data analysis\). Acoustic data that will be analyzed will be primarily active acoustic data from echosounder sensors to determine zooplankton and/or fish targets, abundance, and biomass, but there is an opportunity for involvement in the analysis of passive acoustic data from DMON or Jasco sensors to determine marine mammal detection.](#)

Does Not Meet Standards

SECTION 4: APPRAISAL & DOCUMENTATION

Appraisal

Check only one rating level to appraise the employee's performance during the past year on the duty described above. Use the explanations for the rating scales described in Section 2.

☒ **Meets Standards**

☐ **Does Not Meet Standards**

Support for Appraisal

Data analysis is Delphine's primary Key Duty (50%). She is doing an excellent job. She has spent the last year applying methodological techniques and protocols that she developed to the complex active acoustic data processing and analysis. She will continue these duties over the next year as data collection for different projects is ongoing and new projects begin, including those being developed that will include both glider- and vessel-based active acoustics data collection, processing, and analysis. She will also conduct additional data analysis (statistical analyses to pair active acoustic data with other oceanographic parameters) that will contribute to the development of data products, manuscript preparation and writing, and further research being developed.

Employee Name: [Delphine Mossman](#)

Key Duty #2: [Data Visualization and Interpretation](#)

SECTION 3: PERFORMANCE STANDARDS

For each key duty, describe the performance expectations for the **Meets Standards** level of performance for the current evaluation process.

☐ **Check here and detail on an attached page if standards are being modified for next year's evaluation process.**

Meets Standards

[Produce figures and other data products and write text for contribution to reports, proposals, manuscripts, and presentations with or for supervising faculty](#)

Does Not Meet Standards

SECTION 4: APPRAISAL & DOCUMENTATION

Appraisal

Check only one rating level to appraise the employee's performance during the past year on the duty described above. Use the explanations for the rating scales described in Section 2.

☒ **Meets Standards**

☐ **Does Not Meet Standards**

Support for Appraisal

Delphine is providing data products (stemming from the data processing and analysis conducted in Key Duty #1) that are not only meeting the requirements of our project obligations, but also contributing significantly to the development of exciting new research questions that are being integrated into new proposals to advance the research. These data products are being used in project reports, presentations at scientific meetings and to relevant stakeholders, and new project proposals. Over the next year, Delphine will continue developing new data products from the ongoing data collection efforts (and new projects) but will also begin contributing to data interpretation that will be utilized in manuscript preparation and writing.

SECTION 3: PERFORMANCE STANDARDS

For each key duty, describe the performance expectations for the **Meets Standards** level of performance for the current evaluation process.

☐ Check here and detail on an attached page if standards are being modified for next year's evaluation process.

Meets Standards

[Vessel-based fieldwork and discrete sampling and laboratory-based identification and enumeration of zooplankton from preserved samples collected from the fieldwork. Gathering of available relevant fish-based datasets \(e.g., bottom trawl data\) from Rutgers or external sources. These empirical data will aid in acoustic data analysis.](#)

Does Not Meet Standards

SECTION 4: APPRAISAL & DOCUMENTATION

Appraisal

Check only one rating level to appraise the employee's performance during the past year on the duty described above. Use the explanations for the rating scales described in Section 2.

☒ **Meets Standards**

☐ **Does Not Meet Standards**

Support for Appraisal

Delphine has been an active participant in the fieldwork and collection of discrete samples (zooplankton tow samples) and is conducting the laboratory processing and analyses of these collected zooplankton samples. Over this last year, Delphine has been leading these efforts and also led the training of two undergraduate students who continue to work under mine and Delphine's advisement. Delphine is also leading the planning for upcoming vessel-based active acoustic calibration and data collection, processing, and analysis efforts for a new project that recently started.

Employee Name: [Delphine Mossman](#)

Key Duty #4: [Data Management](#)

SECTION 3: PERFORMANCE STANDARDS

For each key duty, describe the performance expectations for the **Meets Standards** level of performance for the current evaluation process.

☐ **Check here and detail on an attached page if standards are being modified for next year's evaluation process.**

Meets Standards

[Perform data quality control \(QC\) on laboratory and acoustic-based data and submitting QC'd datasets to appropriate databases pre-assigned by faculty supervisors](#)

Does Not Meet Standards

SECTION 4: APPRAISAL & DOCUMENTATION

Appraisal

Check only one rating level to appraise the employee's performance during the past year on the duty described above. Use the explanations for the rating scales described in Section 2.

☒ **Meets Standards**

☐ **Does Not Meet Standards**

Support for Appraisal

Delphine is doing an excellent job ensuring the collected data are of the highest quality. She is using published and community-accepted approaches for the active acoustic data analyses and is working with other technical staff to submit the quality-controlled glider-based acoustic datasets to data repositories that are required for data management in funded projects and allowing the datasets to be openly accessible. These tasks will continue over the next year for glider-based and potentially vessel-based active acoustic datasets. She is also interested in participating in training opportunities to help further develop her technical and analytical skillset. I will assist in finding and supporting those opportunities.

Key Duty #5: [Presentations & Training](#)

SECTION 3: PERFORMANCE STANDARDS

For each key duty, describe the performance expectations for the **Meets Standards** level of performance for the current evaluation process.

☐ Check here and detail on an attached page if standards are being modified for next year's evaluation process.

Meets Standards

[Presentation/co-presentation of data to a wide range of audiences \(project colleagues, program managers, industry stakeholders, broader ocean science community\) at internal, scientific, and/or public meetings. Train graduate students on bioacoustics data analysis techniques and/or data interpretation](#)

Does Not Meet Standards

SECTION 4: APPRAISAL & DOCUMENTATION

Appraisal

Check only one rating level to appraise the employee's performance during the past year on the duty described above. Use the explanations for the rating scales described in Section 2.

☒ **Meets Standards**

☐ **Does Not Meet Standards**

Support for Appraisal

Delphine has been an integral participant in both undergraduate student and graduate student training. She helped train two undergraduate students on discrete zooplankton sample processing and analyses, and will continue to lead the training of new undergraduate students on these efforts going forward. Over the past year, she also assisted a graduate student in our Masters of Operational Oceanography program in techniques for active acoustic data analyses that contributed to his thesis research. There will be more opportunities for Delphine to train additional graduate students in these approaches going forward. Additionally, Delphine contributed data products for presentations delivered over the past year, and presented results herself at the Mid-Atlantic Chapter of the American Fisheries Society annual meeting this past October. We will be looking for opportunities for Delphine to present again at future meetings. Delphine has also expressed interest in participating in education and outreach efforts, and we will look for those opportunities for her to contribute toward her development over the next year.

Employee Name: **Delphine Mossman**

SECTION 5: PERFORMANCE IMPROVEMENT OR ENHANCEMENT

To be completed by supervisor based on performance ratings from prior year and performance expectations for upcoming year. **Must be completed and specific guidelines provided on how to improve performance if overall evaluation is "Does Not Meet Standards".**

Delphine's performance on her Key Duties meets standards. Please see individual Key Duties for details on efforts Delphine will undergo over the next year toward her development.

SECTION 6: SIGNATURES AND COMMENTS

Overall Appraisal Rating (from Section 2): ☒ Meets Standards

☐ Does Not Meet Standards (will be re-evaluated by October 15 of this year)
